How U.S. Media Structure Creates Climate for Disinformation

- Media monopolies undermine our news and information systems. The decrease in informative, fact-based journalism has created a void for disinformation to fill
- Disinformation is profitable. Hypercommercial, algorithmically driven media system prioritizes extreme, polarized content
- Lack of effective regulatory oversight enables the spread of disinformation and undermines democracy

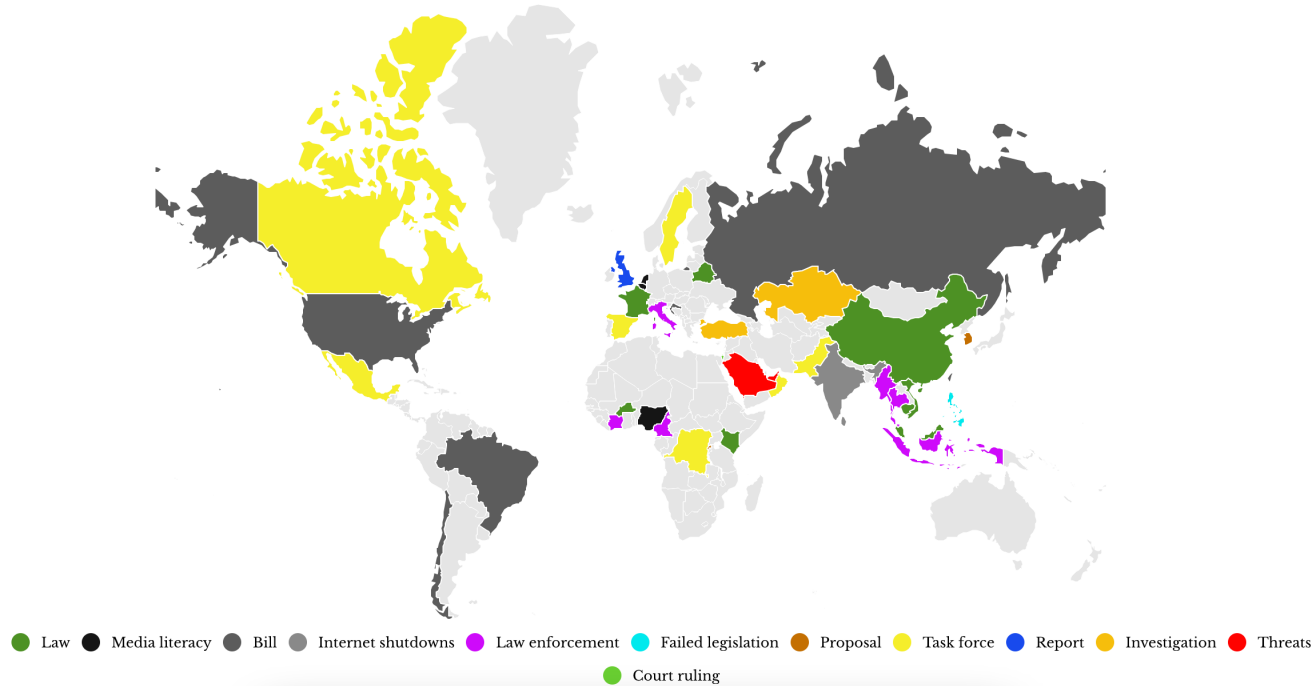

Digital Services Act & Digital Markets Act

New landmark rules for online platforms in the EU.

#DigitalServicesAct #DigitalMarketsAct #DigitalEU

Here's where governments are taking action against online misinformation

Systemic Solutions Required

- Invest in media literacy (but it alone insufficient)
- Break up monopolies/ oligopolies
- Require public interest protections / obligations
- Use libel lawsuits to punish bad actors
- Establish a public media option. We need nonprofit media institutions supported by public subsidies

Thank you!!
